OFF-ROAD EQUIPMENT

EXHAUST GAS PURIFIERS

 **FACT:** Propane engines, although they seem very clean, are the second worst carbon monoxide (CO) emitters.

Average CO emissions from a well-maintained internal combustion engine:

- Diesel Engine 1,000 - 1,500 PPM
- Propane Engine 3,000 - 10,000 PPM
- Gasoline Engine 20,000 - 80,000 PPM

Industrial equipment (forklift trucks, sweepers, and construction machinery), operating in confined, poorly ventilated areas, affect the health of their operators and other employees. Headaches or nausea often attributed to stress on the job, are often symptoms of carbon monoxide poisoning.

Air quality standards in a work place are specified by the Occupational Safety and Health Administration (OSHA) and other governmental bodies. These agencies specify that the threshold limit value (TLV) for CO exposure per eight (8) hour shift cannot exceed **35 parts per million (PPM)**.

 **SOLUTION:** Exhaust Gas Purifier is a genuine solution to this problem.

- Over 90% reduction of toxic gases (immediately after engine start-up)
- Extra catalytic surface for the best possible efficiency
- Corrosion resistant materials used to build the units
- Wide variety of direct replacement designs (reduces installation time to the minimum)
- Low back pressure (no loss of power)
- Maintenance free
- 1-year workmanship and performance warranty
- Pyrometer kit included, propane only
- The most affordable product of this kind on the market: immediate availability and technical support

 **ACTION:** Take advantage of our professional expertise.
